To Whom It May Concern

I am pleased to write this letter to support Ms. Shahrzad Tabatabaei's application for the São Paulo School on nonlinear dynamics.

Shahrzad is my second-year PhD student, whose research mainly focuses on developing analytical models for the stability and dynamics analysis of flexible slender structures subjected to axial fluid flow. Nonlinear dynamics is at the heart of her research project, and the above-referenced school is a unique opportunity for her to acquire a good understanding of the topic.

Shahrzad has a strong background in Mathematics, Solid and Fluid Mechanics. She is smart, and she has great analytical skills as well as programming qualifications. Her communication skills including writing and speaking in English are excellent. Shahrzad constantly strives for excellence in her studies, and her CGPA is 4.0 out of 4.3. In addition to technical competencies, Shahrzad has a great personality; she is very polite, mature, friendly and reliable.

I strongly recommend her for attending the São Paulo School on nonlinear dynamics. Please do not hesitate to contact me should you need further information. Thank you.
